

Satellite Radio is the best thing that ever happened to Radio...Why should any one have the right to regulate traffic and weather reports ...let alone satellite radio.....This is not a free service...I have CHOSEN this just as I have CHOSEN to have premium stations on my cable....Let the public decide what they want.....We have that right and jealous, inadequate radio stations who are NOT making it should take an example of things that please the public and make some changes.....KEEP SATELLITE RADIO AS IT IS...IT IS GREAT.....IT IS THE WAVE OF THE FUTURE1.7 million subscribers cannot be ALL wrong
